- Web Developer Intern at Project Happiness (Non-Profit Organization)
- IT Technician at TechCare Co.

TECHNICAL SKILLS

- JavaScript, NodeJS
- HTML5/CSS3,Bootstrap
- SQL/MySQL/JDBC
- ExpressJS
- SVN/Git

RELEVANT COURSEWORK (SPRING 2018)

Software Systems Engineering, Enterprise Software Platforms, Web UI Design and Development

PROJECTS

FALL 2015- SPRING 2018

- As a web developer intern at project happiness, I worked with the team of designers and developers to create their new website. In addition, I contributed to the website performance by user testing at various stages of the development.(Summer 2016 Internship)
- In a team of six, I worked on front-end of an application using bootstrap, HTML, CSS and AngularJS that allows people to organize their medication/supplements and create reminders with an easy and user friendly interface.(Software Engineering Course)
- In a team of three, I managed our project from requirement to implementation, working on a flight Reservation system using Java as the front-end,MySQL as the back-end and JDBC.(Intro to Databases Course)
- Currently working on the requirement elicitation for our project in Web UI Design and Development course using the MEAN stack.
